Password Complexity

The screenshot shows a 'System Configuration' window with a blue title bar and standard Windows window controls. It has four tabs: 'Site Table', 'Field Labels', 'Security Filters', and 'Password Complexity', with the last one being active. The 'Password Complexity' tab contains several settings. 'Minimum Acceptable Length' is set to 6, with a range of (2-13) shown. Below this are four options, each with 'Yes' and 'No' radio buttons: 'Disallow User First/Last Name' (No selected), 'Disallow User Id' (No selected), 'Disallow Numeric in First/Last Position' (No selected), and 'Disallow Reuse' (No selected, with a 'Previous' button showing 0). 'Disallow Embedded Blanks' has a 'Yes' radio button selected. A section titled 'How many rules must be met:' has a value of 1 entered in a text box. Below this are four radio button options for password rules: 'Password requires 1 or more lower case alpha characters (a-z).', 'Password requires 1 or more upper case alpha characters (A-Z).', 'Password requires 1 or more numeric characters (0-9).', and 'Password requires 1 or more special characters.' The special characters are listed as ~`!@#\$%^&*()_-+={}[]\|;:'<>.,?/. At the bottom are 'Save', 'Exit', and 'Help' buttons.
